

Ricardo (Zhicong) Xie

Systems / Project Engineering Intern | Requirements, Risk and Technical Coordination

Auckland, New Zealand | +64 29 027 29390 | zxie588@aucklanduni.ac.nz | LinkedIn: <https://www.linkedin.com/in/ricardo-xie-6394643b4> | Portfolio: <https://zxie588-alt.github.io> | GitHub: <https://github.com/zxie588-alt>

Valid NZ student visa | No sponsorship required | 25h/week during semester | Full-time 17 Nov 2026 - late Feb 2027

PROFILE

- Mechanical master's student with team-lead evidence in requirements, trade studies, risk and verification.
- Best fit: project engineering, systems engineering, infrastructure and technical coordination internships.
- Project screenshots and source links: <https://zxie588-alt.github.io>

EDUCATION

University of Auckland - Master of Engineering Studies, Mechanical Engineering | 2026 - Present

Current study and project work in building services, smart manufacturing, CFD/thermal modelling, composite structures and engineering methods. Relevant coursework: Engineering Methods, Advanced Industry 4.0 Smart Manufacturing, Manufacturing and Industrial Systems, Research Project

Huazhong Agricultural University - Bachelor of Engineering, Mechanical Engineering / Mechatronics | 2021 - 2025

Mechanical design, CAD, electrotechnics, sensors, embedded control and mechatronic system integration.

PRACTICAL AND TEAM EXPERIENCE

- Manufacturing workshop training: prepared AutoCAD/DXF laser-cut profiles and compared drawings with cut parts.
- Engineering practice: interpreted force-displacement tests, controlled a robotic arm and led a small automotive-structure walkthrough.
- Technical communication: former student news lead with photography and project-documentation experience.

PROJECT WORK

Team Systems Engineering Feasibility Study

Stakeholders, requirements, ConOps, trade studies, risk, verification

- Led systems-engineering structure for a 5-person technical feasibility study.
- Built stakeholder map, requirements hierarchy, ConOps, trade criteria and risk register.
- Used verification gates to keep orbit, power, thermal, communications and cost assumptions aligned.

Small Residential MVHR / ERV Revit MEP Coordination

Revit 2026 MEP coordination, MVHR/ERV layout, airflow schedule, SolidWorks, AutoCAD/DXF, NZBC G4/H1 context, commissioning notes

- Built a NZ residential MVHR/ERV package with Revit MEP, CAD evidence and review notes.
- Modelled MVHR unit, ducts, terminals and hangers in SolidWorks; exported STEP, STL, DXF and PNG.
- Created a Revit 2026 model with plan, 3D view, airflow schedule, sheets and simple clash notes.
- Checked 60 L/s supply, 45 L/s extract and 85 L/s boost against duct velocity and pressure allowances.
- Added M-102 pressure review, BIM issue log and Mitsubishi Lossnay LGH-35RVX3-E selection note.
- Linked the design to NZBC G4/H1, Healthy Homes context and a commissioning test plan.

Ruggedized Outdoor IoT Sensor Module Design Package

SolidWorks, enclosure design, DFM notes, Keil C, validation workflow

- Designed a SolidWorks enclosure with gasket stack-up, screw bosses, PCB envelope and service access.
- Prepared DFM notes for CNC review, 3D printing and assembly tolerance checks.
- Screened corner-load, strap-lug and screw-boss regions with an FEA-style check.
- Built Keil C firmware structure with sensor, battery and state-machine modules.

Manufacturing Workshop Training & DXF Preparation

Laser cutting, AutoCAD/DXF, CNC machining exposure, 3D printing workflow

- Prepared AutoCAD/DXF geometry for laser cutting and checked the cut plate against drawing intent.
- Practised CNC workflow: workholding, tool motion, cutting fluid, chip formation and shop safety.
- Reviewed machined gears and shafts for tolerance, edge quality and tool-access constraints.

TECHNICAL SKILLS

- Proficient in: stakeholder mapping, requirements hierarchy, ConOps, requirements traceability, trade studies, risk register and verification gates
- Proficient in: team alignment, assumption tracking, decision logs, technical integration, review preparation and evidence-based documentation
- Familiar with: HVAC layout, Revit MEP handoff, manufacturing constraints, simulation checks, mechatronic sensor systems, SolidWorks, AutoCAD/DXF, Abaqus and ANSYS Fluent/CFX
